RE : Application for Software Engineer Role

Dear Mr./Ms./Mrs.,

Please find attached my resume in support of my application letter for the above position.

I am a standards-driven, positive and enthusiastic programmer who is seeking employment in a role where i will have a responsibility for numerous tasks and projects that help the organization achieve its commercial and financial goals.

I have studied the job description very well and I believe i can be an asset to your organization. I also believe that my qualifications and work ethic make me a strong candidate for this position.

I am a graduate of Bachelor of Science in Computer Science from Rift Valley University on July 2022. During that time, I developed the necessary skills to be an effective member in your organization. I have learned numerous things which include excellent communication skill, being a strong team player, being a fast learner , the ability to solve complex problems on my own or within a team and the ability to continuously grow and get better at any given task, while also acquiring the necessary knowledge in my field.

I am applying to work for your company because i would like to work in an environment where I can improve my coding and design skills by working for an organization that already includes experienced employees which can help me develop in my field. I also want to help the organization achieve its goal while also achieving my own. I believe that your organization will help me further my knowledge and skills.

If am successful in my application, i will work hard to make a positive difference in the role whilst carrying out my duties to a high standard and inline with company policies and procedures.

Sincerely,

Kibrom Leulseged
